

# Medicine Safety *Tips*

*Take control of your own health  
by knowing how to take your medicines safely.*

*Here are some tips to help you:*

## **At your doctor's office**

- Keep a list of the medicines you take, including prescribed and over-the-counter drugs, vitamins, herbs and supplements. Update your list when you are taking a new medicine or have stopped taking a medicine.
- Bring the list to your doctor and pharmacist. Your list will help them make sure your medicines work well together.
- Tell your doctor about any allergies to medicines or vaccines you have had in the past.
- Learn about the facts and side effects of your medicines.
- Follow your doctor's instructions on how to take your medicine. Make sure you know why you are taking the medicine and how to take it.

## **At home**

- Keep all medicines out of the reach of children and pets. Follow your pharmacist's instructions on how to store your medicine.
- Each time you take your medicine, read the label and make sure you are taking the right medicine. Take your medicine as your doctor has taught you. Call your doctor or pharmacist if you have any questions.
- Check the date on your medicines. Throw away any medicine that has expired or is no longer needed.
- Do not share medicines with others.
- If you feel that a medicine is making you sick or causing you pain, call your doctor right away.
