

Tips for Weight Control

Change doesn't happen overnight. Focus on step-by-step changes. Two pounds is the most you should lose in one week without overdoing it.

Watch what you eat

- **Grocery shopping.** Eat before you go to the store. You will be less likely to buy more than you need. Also, make a list and stick to it. Shop in the fresh foods section of the store.
- **Cooking methods.** How you cook is just as important as what you cook. Broiling, baking, roasting and stewing are the best methods. Avoid frying.
- **Eat balanced meals.** Plan your meals to include a variety of foods, such as fruits, vegetables and whole grains. Limit the amount of fast foods and processed foods you eat.
- **Cut down on portions.** Reduce the amount of food you put on your plate. Use a smaller plate. Eat slowly, and stop eating when you are full.
- **Don't skip meals.** Eat breakfast every day. Your body needs fuel to help you through the day. Avoid high-calorie snacks like candy and ice cream.
- **Plan for difficult situations.** Eat a healthy snack before parties and other get-togethers. Avoid nibbling.

Rethink your drink

- **Limit alcohol.** It has plenty of calories and no nutrition.
- **Watch out for sugary drinks.** A 20 oz. soda is like eating 22 packs of sugar! Limit sodas, energy drinks and sports drinks. Fruit juice also has a lot of sugar. Eat whole fruit instead.
- **Drink more water.** Your body depends on water to work properly. Aim for at least 8 cups every day. Add a slice of fruit, cucumber or mint to give it flavor!

Exercise

- **10 minutes at a time.** Burn extra calories 10 minutes at a time. Aim for 30 minutes a day when you're ready. Be consistent and drink water.
- **Strength exercises really help.** Work out your major muscles, like your arms, legs and stomach. Canned foods can be used to do arm curls.
